My name is Jasreet Kaur, but I go by Asees and I am excited to be running for the position of Director At Large for the SUO. As an international student from North India, I am currently in my 2nd year of Management degree and have always been passionate about leadership and student advocacy to create an inclusive community.

Furthermore, leadership has always been an important part of my journey from high school to university. Based on this, I was actively involved in my school's student council and had the honour of serving as the Club Captain where I worked with other members to organize events for students and reinforce engagement. This experience has highly influenced me to take up leadership positions at university as well and I had the privilege of serving as the VP Student Resources at the Management Student Association and a Residence Advisor on campus this year. Both these positions have provided me with diverse experiences and strengthened my ability to support and lead the students.

Outside of academics, I love travelling and have been to 10 countries so far collecting insights from around the world. Moreover, I am a dog lover and own a cute golden retriever named Muffin and have a deep appreciation for cheesecakes. Additionally, I am a certified nail technician and a resin artist which demonstrates my love for art. As an extrovert, I love making new connections and long lasting relationships which is a required skill in the business field.
