I am Shukan Miteshkumar Shah. I am currently pursuing my Bachelor of Science at the University of British Columbia, specializing in Computer Science. Throughout my academic career, I have actively engaged in diverse technical projects and professional experiences that have shaped my ability to problem-solve, collaborate, and drive impactful initiatives. My professional background includes my role as a Technology Equipment Officer at Elections BC, where I was responsible for setting up secure election technology across Kelowna in 13 election office, ensuring the integrity of sensitive election materials, and providing troubleshooting support. I have always been passionate about leadership and community engagement. As the Head Boy in my school. My involvement with Colors of Age, an initiative where students visited old-age homes, reinforced my commitment to fostering inclusive communities and meaningful connections. As the Faculty of Science Representative, my goal is to enhance academic support, technological access, career development, and student engagement. I will advocate for more research assistant positions and peer mentorship programs to help students navigate their academic journeys effectively. Additionally, I will work to expand career fairs, hackathons, networking events, and co-op opportunities, bridging the gap between students and industry leaders. Finally, I am committed to fostering a stronger science student community by supporting cross-disciplinary clubs, organizing interactive events, and advocating for a Faculty of Science Council to ensure student voices are heard in decision-making.
