

Ibrahim Raslan

**SUO GENERAL
ELECTION 2023**

Vice-President Campus Life Candidate

Born and Raised in Saudi, Originally a Lebanese Canadian with Russian Descent, I strive and endeavor in uplifting myself and others around me. I love and enjoy knowing I am and can make an impact whenever and wherever I can. I have interacted with all sorts of people. Coming from an international school for about 18 years of my life, and then coming to the diverse mix of people here in the University of British Columbia, I knew I would fit right in and make many friends. I am currently studying Civil Engineering, a field I enjoy despite the tough times that come with it.

Things I enjoy doing in my free time are things like getting a workout in the gym by myself or with my friends, playing sports, and going out with friends and having a good time. I have done international debates before, such as the well known MUN in Denmark, where I got to learn how to debate with others about serious ongoing topics and learned what it takes to convey your points across and have a well rounded impact to the general debates.

I have worked a few jobs in my life, none of them were major, some voluntary and some minimum wage jobs, but it taught me that I should strive for better jobs as I could not see myself working too long at those jobs.
