My name is Dina and I'm a graduate student in the School for Social Work. I'm running for the position of Faculty of Health and Social Development Student Representative. I decided to run after attending the Annual General Meeting last year and learning how much influence we (the Student Union) can have on the decision-making process that impacts us. One of my goals is to make the SUO By-laws, Regulations, and processes more accessible for students so that they're encouraged to participate as a union (by accessible I mean, simple, straight forward, jargon free language that everyone can understand and engage with). The three Schools under the Faculty of Health and Social Development are full of students who are currently working or studying to be in a helping profession. I'm interested in learning more about what these students need and advocating on their behalf for better supports and resources. I'm especially interested in advocating for more resources for students who are doing a practicum placement as part of their program. I hope to bring you more accessibility and advocacy. Thank you for voting for me.
