

Sahar Sowdagar

**SUO GENERAL
ELECTION 2024**

**Faculty of Applied Science Representative
Candidate**

My name is Sahar Sowdagar, and I'm running for the role of Student Representative for the Faculty of Applied Science. Coming from Dubai, I bring with me a commitment to fostering a dynamic and inclusive academic environment within the Faculty of Applied Science.

Having recently commenced my journey in a Master of Applied Science in Electrical Engineering, I am eager to contribute my energy and insights to our academic community. During my undergraduate years, I actively engaged in various leadership roles, serving as the President of the Women in Engineering Club, where I championed diversity and empowerment within STEM fields. Additionally, I had the privilege of representing my peers as the Student Representative of the Engineering College, advocating for their needs and concerns at all levels of decision-making. On top of that, as the Vice President of the IEEE Club, I collaborated with fellow enthusiasts to organize impactful events and workshops.

Through my experiences, I've honed essential skills in communication, collaboration, and problem-solving. If chosen as the Faculty of Applied Science Student Representative, my goal is to amplify student voices, foster a supportive academic environment, and collaborate with faculty and administration to implement positive changes that benefit our entire community.
