

OLIVER HALE

**SUO GENERAL
ELECTION 2026**

Director-at-Large Candidate

I am a 3rd year mechanical engineering student with a focus in biomedical engineering. I'm also an artist, musician, and athlete. My diverse range of interests shapes how I think about community, creativity, and connection. Engineering has trained me to approach problems logically and make decisions grounded in evidence. Music and art have taught me to listen carefully, value different perspectives, and appreciate the human side of every issue.

As Director at Large, I want to represent students who are multifaceted, ambitious, and thoughtful. I care about transparency, inclusive dialogue, and ensuring that decisions reflect the real experiences of the broader student body. I'm motivated by the opportunity to help create a student union that feels engaged, responsive, and genuinely supportive of its community.

I will help to make the SUO run efficiently. I hope that students get the most out of their university experience, and an effective student union can make that happen. To me, this means slots of events, including live music and free food. For those who aren't tapped into the UBCO socials, it can be hard to find out about events on campus, so I will try to improve the marketing of events. I specifically want to set up signs promoting events rather than just posters, which most people don't see.
