KRISHANSH DHAWAN

SUO 2026 BY-ELECTION

Faculty of Applied Science
Student Representative Candidate

KRISHANSH

Hi, I'm Krishansh Dhawan, a Mechanical Engineering student at UBC Okanagan. I've served as your SUO Applied Science Representative over the summer, and I'm running to continue that work.

As the former President of the Okanagan Engineering Society, I've worked to support engineering clubs, organize industry events, and create opportunities for students to connect beyond the classroom. Over the summer, I also served as Chair of the SUO Oversight Committee, working on executive accountability and action plan reviews.

My plans include industry sessions connecting students with companies, inter-faculty sports and social events, competitions between engineering clubs, and another SolidWorks Sprint. I'm also planning regular discussions with engineering design teams and a leadership conference for their executives, creating opportunities to raise concerns, exchange ideas, and improve continuity between leadership teams.

I want to strengthen the connection between Applied Science students, EngSoc, and the SUO, while turning these plans into opportunities students can take part in. I'll keep students informed, listen to feedback, and follow through on the concerns you bring forward.

I would appreciate your vote for Applied Science Representative.

Thank you
Krishansh Dhawan
